

Nordic Climate Group acquires another cooling company in Finland

MV-Jäähdytys, part of Nordic Climate Group and focused on cooling technology and professional catering equipment, has acquired the firm of Konehuolto Jorma Heikkonen. The acquisition strengthens MV-Jäähdytys's position in Finland and its offer for installation and service of air-sourced heat pumps in the consumer markets in Nyland and Kanta-Tavastland. Carried out on 30 December 2022, the move is part of MV-Jäähdytys's strategy and plan for growth.

"Konehuolto Jorma Heikkonen enjoys an excellent reputation for high quality and satisfied customers. This acquisition is a great complement to our operations. We're gaining extensive know-how in installation and maintenance of air-sourced heat pumps for private customers," says Ilpo Mäkelä, CEO for MV-Jäähdytys. "Together, we'll be ready to meet the strong demand we're seeing," Mäkelä adds.

MV-Jäähdytys Oy, with 50 years of experience in the market, provides maintenance and contracting services throughout Finland. The company's expertise is impressive and covers applications from heating and cooling to professional catering equipment.

Nordic Climate Group focuses on helping its customers minimize their climate footprint and maximize energy efficiency. The plan is to continue building a leading company in Northern Europe, with strong organic growth as well as expansion through acquisitions. We are convinced that our success is a result of entrepreneurial spirit, decentralized operations with cooperation in business, negotiations, and procurement, effective training, and sharing of technological know-how.
